

Program 5:

UPSTREAM PERFORMANCE

● MAIN OBJECTIVES

● Increase Oil & Gas production and pipeline of proven reserves and improve recovery rates and cost performance through world-class technology

PROGRAM REVOLVES AROUND THREE MAIN TOPICS

A

Increase production rate from existing fields through: -
Existing wells

-New activities

-wells & facilities

B

Improve efficiency and adopt new technologies

● Achievements

Maintain oil & gas production despite the natural decline through encouraging collaboration between JVs to achieve operational efficiency & unlocking more resources

● Achievements

Maintaining Oil & Gas & Condensate production increase 2017:

- Enhanced production to Overcome the natural decline during 2017
 - 25% decline in Gulf of Suez
 - 40% decline in western desert
- Increased production with incremental 20,000 barrels oil ; 9,000 barrels condensate and 1000 MMSCF gas).
